
FLEXIBLE OIL HOSE

Hauck Flexible Oil hose provides a safeguard against the hazards of oil leakage. Constructed of steel or bronze as standard item, Hauck oil hose offers strength and serviceability along with flexibility.

- GREAT FLEXIBILITY
- BRASS OR STEEL CONSTRUCTION
- EXTRA STRONG
- WIRE ARMOR ENCASED

CONSTRUCTION

Two types of construction are available as Hauck standard items. One, steel, is made from a single continuous piece of seamless drawn steel tubing having deep convolutions to allow the necessary flexibility. It has a braided steel wire casing and male connections. The other, bronze, is available in seamed brass hose with a braided bronze wire casing and fixed nipple male connections.

SELECTION

For standard items, select the model number from the adjoining tables and supply it in the following format. (Example)

HOSE, FSH1405A FLEXIBLE STEEL

For requirements which cannot be met by the standard sizes, consult your local Hauck engineer. Special construction materials and hose lengths are available on request.
